Bruce Bass, Public Works Director stated that this winter has been a long and difficult one. He discussed several ongoing projects, projects that have been completed, and the difficulty of working with the melting snow. Commissioner Becker extended his thanks to the Road and Bridge team for all of their hard work.

PUBLIC HEARING

Chairman Westhoff called the hearing to order at 9:22 a.m. in the Assembly Room of the Morgan County Administration Building. Present were, Chairman Gordon Westhoff, Commissioner Jon Becker, Commissioner Mark Arndt and Morgan County Planning and Zoning Administrator, Nicole Hay.

1. **Applicant:** Tim Naylor, Hannah Dutrow/AGPROfessionals
2. **Landowner:** T3 Land & Investment, LLC
3. **Legal Description:** A part of Sections 32 and Section 33, Township 4 North, Range 55 West, and part of the North half of Section 4, Township 3 North, Range 55 West of the 6th PM, Morgan County, Colorado aka 32295 Hwy 34, Brush, Colorado 80723.
4. **Request:** Amended Use by Special Review Permit to expand the permitted Pinneo Feedlot livestock confinement operations from 44,000 head of cattle to 65,000 head of cattle or from approximately 35,000 animal units to 51,350 animal units respectively. In addition, they intend to install additional pens east of the existing pens. The proposed cattle pens will be graded to drain to a new proposed pond.

COMMISSIONERS PROCEEDINGS 3

5. **Date of Application:** December 27, 2022.

Ms. Hay stated that the application is for an Amendment to a Special Use Permit to allow for the expansion of an existing permitted Pinneo Feedlot livestock confinement operations which was granted by Resolution 90 BCC 57 and amended in Resolution 97 BCC 51 and are included in your packets. The permitted area is located in part of Sections 32 and Section 33, Township 4 North, Range 55 West, and part of the North half of Section 4, Township 3 North, Range 55 West of the 6th PM, Morgan County, Colorado aka 32295 Hwy 34, Brush, Colorado 80723

The owner is requesting an expansion from 44,000 head of cattle to 65,000 head of cattle or from approximately 35,000 animal units to 51,350 animal units respectively. In addition, they intend to install additional pens east of the existing pens within the existing footprint of the feedlot operations. The proposed pens will be graded and drained to a new proposed pond. The existing containment areas will not be expanded or changed. The property is zoned Agriculture Production.

In reviewing this application, the Planning Commission and Board of County Commissioners are required to make a finding that the criteria for granting a Use by Special Review in Section 2-395 of the Morgan County zoning regulations has been met.

Section 2-395 Special Use Permit Criteria:

- A. The use and its location as proposed are in conformance with the Morgan County Comprehensive Plan. Specifically:

The property is located in the Brush-East Activity Center planning area as defined by the Morgan County Comprehensive Plan. The area east of Brush remains agriculture that must be protected and allowed to expand. In this area Comprehensive Plan goals include:

Encourage the preservation of agricultural production land to ensure continuation of this important industry.

The request to expand the livestock confinement operation will encourage the preservation and continuation of the industry.

Maintain open space buffer around livestock facilities.

The proposed expansion would be to the east and will allow the open space buffer along the western border of the site to remain.

- B. The application documents are complete and present a clear picture of how the use is to be arranged on the site.
- C. The Site Plan conforms to the district design standards of Section 2-420 and Section 4-200 of the Morgan County Zoning Regulations.
- D. All on and off-site impacts have been satisfactorily mitigated either through agreement, public improvement, site plan requirements or other mitigation measures.
The operation is existing and the additional impacts are expected to be minimal. Proposed use impacts upon existing uses are detailed in the included Nuisance Control Plan and in the Preliminary Environmental System Design.
- E. The special use proposed has been made compatible with the surrounding uses and is adequately buffered from any incompatible uses by distance and topography.
Buffering from adjacent agricultural uses is not necessary.
- F. The special use poses no or minimal risk to the public health, safety and welfare.
Amending the original granted Special Use Permit will not increase risk to public health, safety or welfare.
- G. The special use proposed is not planned on a nonconforming parcel.
The proposed amendment is located on a conforming parcel.
- H. The applicant has adequately documented a public need for the project. The Applicant has submitted all pertinent technical information, has demonstrated that it has adequate financial resources to implement the project, and has paid all County fees and review costs.
The existing feedlot operation supplies cattle for consumption and to local facilities to be made into food products.
- I. For any special use requiring a supply of water that the applicant has demonstrated a source of water which is adequate for the proposed use in terms of quantity and reliability and in the case of human consumption, quantity, quality, and reliability.
Water is adequate using wells, well permits are included in this packet.

The following conditions are recommended if the Amended Special Use Permit is approved:

4 COMMISSIONERS PROCEEDINGS

1. Documentation from Colorado Department of Transportation regarding the current access and possible new access permit.

This application was considered by the Planning Commission in a public hearing on February 13, 2023.

A neighboring landowner and a member of the public were present at the hearing who were not in favor of or opposed to the expansion but had questions regarding the water supply and the wells.

The Planning Commission recommended approval on a vote of 5 in favor and 0 opposed, 1 member was absent.

At this time, Chairman Westhoff asked the applicant if there is anything they would like to add to the application, with Tim Naylor with AGPROfessionals giving a presentation about the proposed project.

Commissioner Becker asked Mr. Naylor to elaborate if more water was needed. Mr. Naylor stated that they are currently required to replace 500 acre/ft. of water. But with the decree, up to 750 acre/ft. of water can be used which then will have to be replaced.

Chairman Westhoff asked if the ponds are the designed for a twenty-five year storm event and then asked for clarification about the design of the ponds. Mr. Naylor stated that they have to plan for a twenty-four hour twenty five year storm event when the ponds are designed. There was discussion as to what liner will be used for the pond. Mr. Naylor stated that it will be a clay liner if it was able to be used but if it is not it will be plastic.

Commissioner Arndt asked for clarification on the number of wells that were needed. Mr. Naylor stated that only a portion of the wells on the property were needed for this decree (four total), not all that are on the property.

Commissioner Arndt asked if the current pens were sprinkled with water to mitigate the dust. Mr. Naylor stated that they weren't; but they used several other measures to do so, including creating a hard pack.

Chairman Westhoff asked if there was anyone in the audience present or online who wished to make public comment in opposition or in favor of the application, noting no public comment and closed the public comment portion at this time.

At this time, Chairman Westhoff moved into discussion and decision.

Commissioner Arndt noted that in the past, dust was a large issue upon new construction of feedlot pens. He offered that it was very helpful to prepare the ground as much as possible before the new construction.

Commissioner Becker asked if there needs to be a condition that if they need to have the water even if the decree says it. Ms. Hay stated some applications have had to have it others have not but the commissioners can make it a condition if they would like to

Commissioner Arndt said this application is a little different and feels that it wouldn't be burdensome for the applicant to have a document stating they will have the required amount of water.

Chairman Westhoff questions the CDOT approval with Mr. Naylor stating that CDOT has no problems they have been in training and did not have time to provide the permit, but that there should be no issues with the current access and that it is a formality.

Commissioner Arndt stated that the Board should not be the water police; they do not police the farmers but since this is a special use, that it is a different situation.

Commissioner Arndt made a motion to approve the Amended Use by Special Review Permit to expand the permitted Pinneo Feedlot livestock confinement operations from 44,000 head of cattle to 65,000 head of cattle or from approximately 35,000 animal units to 51,350 animal units respectively. In addition, they intend to install additional pens east of the existing pens. The proposed cattle pens will be graded to drain to a new proposed pond with the legal description being a parcel of land in Sections 32 and Section 33, Township 4 North, Range 55 West, and part of the North half of Section 4, Township 3 North, Range 55 West of the 6th PM, Morgan County, Colorado aka 32295 Hwy 34, Brush, Colorado 80723 with the applicants being Tim Naylor, Hannah Dutrow with AGPROfessionals and landowner being T3 Land & Investment, LLC, as presented by Morgan County Planning and Zoning Administrator, Nicole Hay with the added conditions being that there is a dust plan featuring a hard pack, water engineering and additional augmentation being reported to the county, and CDOT access approval. The motion was seconded by Commissioner Becker. At this time, the motion carried 3-0.

Being no further business the meeting was then adjourned at 9:57 a.m.

Respectfully Submitted,
Kevin Strauch
Clerk to the Board
